## About Me

Experienced Application Engineer possessing good knowledge in effectively handling development, testing, configuration, and deployment of distributed systems. Enthusiastic & eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Ability to contribute independently as well as be a team player.

## Experience

### Nayamsoft India Private Limited April, 2022 – Present

Junior Software Developer

As a full-stack software developer, my role involves designing and developing web applications from end to end. I primarily work with Java in the backend and Angular in the front end. In the backend, I leverage Java to handle server side logic, database interactions, and API integrations. On the front end, I utilize Angular to create interactive user interfaces, implement client-side functionality, and ensure seamless user experiences. My responsibilities encompass coding, testing, debugging, and deploying applications while ensuring they meet the requirements and adhere to best coding practices.

## Projects

### Finmart

Dec, 2022 – April, 2023

#### Description

Finmart is a fintech application that helps people to find Bank accounts, credit cards & personal loans.

#### Responsibilities

- Involved in software development life cycle (SDLC) of tracking the requirements, gathering, analysis, detailed design and development.
- Responsible for developing and designing Rest APIs for all the tasks involved in the project flow.
- Used Typescript and its features such as static typing, classes and interfaces.
- Created Type-script reusable components and services to consume API's service using Component based architecture provided by Angular.
- Build highly responsive UI.
- Implemented and modified various modules as per the client requirements.
- Actively involved performance improvement of the application.

#### Tools

Spring boot, Angular 14, Typescript, Material UI, RXJS, S3 Bucket, CSS3, HTML5, Formio, Zuul, Eureka Server, Docker, Git, GitHub.

# Strengths

- Positive Attitude.
- Co-operative & Keen Observer.
- Ability to multi-task.
- Problem Solving & Creative.

# Personal Profile

DOB – 15 JUN, 1997

Gender – Male

## Permanent Address

Sonamura, Tripura, India

## Corban

April, 2022 – Nov, 2022

### Description

Corban is a Banking Notification Alert System. It is used to send alert message to the customer via SMS, WhatsApp, Email and Telegram.

### Responsibilities

- Responsible for developing and designing Rest APIs for all the tasks involved in the project flow.
- Extensively worked with Java Collection Classes like List, Set etc.
- Created databases design and responsible for creating and modifying Database Objects.
- Implemented Caching Operation for frequent used APIs with the help of Redis and also used Redis Stream as Message Broker.
- Participate in the entire platform lifecycle, focusing on coding and debugging.
- Developed and Designed Grafana dashboard for ActiveMQ, Redis, PostgreSQL database and for all Microservice Applications.
- Collaborate with Front-end developers to integrate user-facing elements with server-side logic.

### Tools

Spring Boot, Postgres, Redis, Zipkin, Apache ActiveMQ, Apache Camel, Elasticsearch, Prometheus, Grafana, Git, Docker, Jmeter

# Education

## Bachelor of Technology In Civil Engineering

2015 – 2019

Swami Vivekanand Institute of Eng & Tech.(SVIET)  
Patiala, Punjabe.

Marks : 72.89%
